

BlueCool Connect and Connect App

One Device Gets All Connections Done

Whenever there is a demand for remote operation and servicing the BlueCool Connect will be the best choice. Checking onboard temperatures and settings, modifying system parameters or collecting a status report and sending it onshore remotely. The BlueCool Connect offers the same functions as if you would be on the spot, but with the comfort of doing it from anywhere in the world with many internet devices available.

Advantages at a glance:

- Accessible from anywhere in the world
- Use any device like Smartphone, Tablet or Computer
- Central monitoring via your Multi-Functional-Display e.g. Garmin OneHelm™
- Minimizes health risks of in-person service
- Use of handheld, portable equipment to monitor A/C equipment periodically
- Collect data and send it onshore remotely

Marine

BlueCool Connect

Technical Specifications

	BlueCool Connect
Operating voltage range (V)	9 - 33
Power consumption (W)	13.5
Input	CAN (SAE J1939)
Output	Wi-Fi Mobile (Telephone) Network LAN - Ethernet
Dimensions (L x B x H) (mm)	140 x 104.9 x 33.8
Weight (g)	0.34
Operating Temperature (°C)	-40 - +80
