Not everyone needs or wants power, so the Manual Vertical series is designed with those in mind. Suited for vessels up to 12m, the above deck installation is fast and straightforward. The manual series is available in a round base configuration (VM500). Featuring an independent low-profile top or capstan and gypsy. The units can also be mounted horizontally in the anchor locker or used as an auxiliary units for line hauling or fishing use.

The low profile, lightweight, compact design makes this unit ideal for the racing enthusiast who cannot afford the weight or space of a powered windlass or for those doing serious ocean cruising or racing who can't afford to rely on battery power.

Precision-engineered, allowing for efficient hauling. The ratchet manual operation system is operated with a standard sheet winch handle and manually released with the same handle.
